SUBMISSION OF INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

MAIL STOP PCT

Hon. Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Dear Sir:

Enclosed please find a copy of the International Preliminary Report on Patentability.

Respectfully submitted,

Heinz Blomeling

Applicant's or agent's file reference .030089WO	IMPORTANT NOTIFICATION				
International application No. PCT/EP2004/008202	International filing date (day/month/year) 22 July 2004 (22.07.2004)				
Applicant CARCOUSTICS TECH	CENTER GMBH et al				
1. Transmittal of the translation to the applicant. The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I). The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II). Transmittal of the copy of the translation to the designated or elected Offices. The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation: KR The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request: AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW 3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s). The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II). It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

International application No.
PCT/EP2004/008202

Box No. V Reasoned statement under A rticle 35(2) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement				
1.	Statement			
	Novelty (N)	Claims	1-19	YES
		Claims		NO
	Inventive step (IS)	Claims	1-19	_ YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-19	_ YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

Claim 1

- Claim 1 meets the requirements regarding novelty and inventive step (PCT Articles 33(2) and 33(3)).
- 2. The subject matter of claim 1 is novel, since the features of independent claim 1 in their entirety are mentioned in none of the documents which are cited in the search report or acknowledged in the introductory part of the description.
- 3. The invention is based on document GB-A-2 216 081 (D1), mentioned in the application, and relates to the production of a sound-insulating composite part comprising a heavy layer (6) and a sound-damping layer (17) according to the features of the preamble of the current claim 1.
- 4. In order to achieve improved recycling properties, the heavy layer (6) and the sound-damping layer (17) of the composite parts are produced by partial welding during pressing of the two layers,

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

according to the features of the characterizing part of claim 1.

- 5. No such combination is disclosed in the method according to the searched prior art and therefore cannot be suggested in conjunction with the features known from D1. The adopted measure, which consists in partially welding the heavy layer (6) to the sound-damping layer (17) by activating welding elements integrated into the press, is the result of a step that does not represent a logical development of the cited prior art. The method according to claim 1 therefore involves an inventive step.
- 6. The method as per claim 1 can be reproduced and applied and thus is considered industrially applicable.

Claim 12

7. Independent product claim 12 is correspondingly worded and therefore likewise meets the requirements regarding novelty, inventive step and industrial applicability (PCT Article 33(2) to 33(4)).

Claims 2 to 11, 13 to 19

8. Dependent claims 2 to 11 and 13 to 19 contain advantageous and non-obvious developments of the method as per claim 1 or of the product as per

International application No.
PCT/EP2004/008202

citations and explanations supporting such statement

claim 12 and therefore likewise meet the

requirements regarding novelty, inventive step and

industrial applicability (PCT Article 33(2) to

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability:

Clarity

33(4)).

Box No. V

9. The current version of claim 1 does not meet the requirement of PCT Article 6. The preamble of product claim 12 states that the heavy layer (6) is made of thermoplastic elastomers. However, no corresponding feature is disclosed in claim 1.
